EDUCATION

Christ Deemed to be University

Bachelor of Computer Applications

Bengaluru, Karnataka

June 2025 – Present

Jusco School Southpark

Major in PCM , Minor in Entrepreneurship

Jamshedpur, Jharkhand

Apr. 2023 – March 2025

EXPERIENCE

Web development Intern

Tata Steel Utilities and Infrastructure Service Ltd

Apr 2026 – May 2026

Jamshedpur, Jharkhand

- Developed a full-stack web reimbursement portal designed for workplace use. Employees submit mobile bill requests through a simple form interface; admins get a dedicated panel to approve, reject, or manage access.
- Developed the application using Html, CSS, React(vite) as Frontend and Supabase PostgreSQL for the Backend data storing and handling
- Explored ways to deploy the project live using Vercel

Backend Trainee

Jusco School Southpark

Sept 2024 – Jan 2025

Jamshedpur, Jharkhand

- Designed and implemented a backend, command-line based Bookstore Management System using Python and MySQL
- Established Python-MySQL connectivity for real-time database operations.Strengthened skills in backend development, SQL queries, and database management.
- Managed book inventory, customer data, billing, and sales records.

Documentation Sub-Head

Ataraxia E-Sports Club, Christ University

July 2025 – Present

Bengaluru, Karnataka

- Managed event documentation, participant records, and match score tracking during Atraxia NEMESIS
- Coordinated real-time updates of match results and maintained organized score sheets.
- Created and managed the POC communication group to streamline coordination between organizers and participants

PROJECTS

Mothers Touch Tiffin | *JavaScript, React (Vite), PostgreSQL*

May 2026

- Developed a hyper-local tiffin delivery platform connecting customers with nearby home cooks
- Designed a real-time order workflow between customers, cooks, and delivery partners
- Integrated Supabase authentication and live database synchronization for seamless order management
- Live Link: <https://mothers-touch-tiffin.vercel.app>

Mobile Reimbursement Processing System | *JavaScript, React (Vite), PostgreSQL*

Apr 2026 – May 2026

- Developed a reimbursement management system for employees and administrators with role-based access control
- Built employee interfaces for reimbursement submission and admin dashboards for approval/rejection workflows
- Implemented real-time request status updates and secure authentication using Supabase
- Live Link: <https://uisl-mrps.vercel.app>

MyMovieMania | *AngularJS, TMDB API, MySQL*

March 2026

- Developed a full-stack movie tracking web application inspired by Letterboxd using AngularJS, TMDB API for real-time data, and MySQL as backend
- Used Node.js and Express for RESTful backend APIs handling business logic and third-party integrations
- Live Link: <https://mymoviemania.vercel.app/>

TECHNICAL SKILLS

Languages: JavaScript, SQL, HTML/CSS, C/C++, Python

Frameworks/Libraries: React (Vite), AngularJS, Node.js, Tailwind CSS

Databases/Backend: MySQL, Supabase, XAMPP

Tools & Platforms: VS Code, GitHub, MS Office, Canva, Google Forms
